EXPERIENCE

2019\2 - 2019\3

X-POSITRON (web)
Web development
Link :
https://xpositron.000webhostapp.com/index.php
This site talks about my branch of the college and explains all its materials and provides links to download and it is responsive to all screen sizes
In the following languages:
Html , Css , Javascript , Php , SQL
I have linked it to a database through the free hosting provided by the webhost site

2021\2 - 2021\3

X-POSITRON (Flutter)
Flutter Developer
I programmed this application for Android , the idea of it is that it talks about my branch in the college and explains all its subjects and provides links to download files of my college

Programmed with FLUTTER & DART for Front-end
And for back-end I used Php & SQL

2022\10 - 2022\11

Cabels
Flutter Developer
Implemented by the Flutter framework
Application idea:
It is an application designed to assist telephone exchange workers in Syria with the process of saving all customers' data, including name, phone number, and other important information, all of which are stored locally in the device's memory.
Application sections:
- Interface showing, modifying and deleting customer information
- Wireless customer data transfer interface (via a local network)
- Settings interface, the user can modify the color theme, send the local database through social networking applications, and import and export the database

features :
- Simple interface easy to use
- The possibility of sharing the database with another device wirelessly with ease

MVC architecture
- GETX Echo System

Clean, reusable code

PROJECTS

- **X_O game (Flutter)**
  The first project using Flutter since 2020, which is a simple tic tac toe game, its advantages:
  - You can play against a computer or a human
  - There are 3 levels of difficulty
  - There is a calculation system for winning and losing
  - You can completely change the colors of the game
  - There is a simple login system

  Github Link : https://github.com/MOUSAHLP/X_O-Game_Flutter
- **Interpolation (Flutter)**
  A project using Flutter , My professor at the university asked me to create this app to help us understand his subject

  It calculates the interpolation of any function according to the Newton - Gregory method

  We give the application several points and it calculates the interpolation and draws the function
  Github link : https://github.com/MOUSAHLP/interpolation
